

Wolf House Night Photography – Light Painting November 6, 2021

You Need to Bring:

- A DSLR, or camera with manual settings that include “Bulb” or capable of 30 second exposures
- A wide angle lens (between 16 and 24mm is best)
 - A cable release, remote trigger, or a 10 second self-timer and a small flashlight or headlamp to make camera adjustments and to move around safely
- A sturdy tripod
- Extra batteries (long exposures and cold temperature burn through batteries faster)
- Memory cards (I recommend shooting in RAW format but not required)
- A lens hood is recommended
