

NATURE'S DESIGN

7th Grade Ecology

AT JACK LONDON STATE HISTORIC PARK FOR TITLE 1 SCHOOLS

NGSS - Ecology

Guided by the Next Generation Science Standards (NGSS), Nature's Design is a unique hands-on field trip experience that offers an in-depth investigation on ecosystem dynamics and biodiversity.

Multiple Visits

Over the course of 3 learning interactions, 7th graders will explore our local ecosystems to collect data on the diversity of flora and fauna. The program includes two school yard lessons and one field trip to the park; all are led by park educators.

Free to Schools

Through the support of our funders, we are able to offer this program completely free to schools that qualify for Title 1 funding. This includes all program materials and the bus for your field trip to the park.
